

ICAO Assembly approves ATSEP License

Tuesday, 25 September 2007

Last Updated Tuesday, 02 October 2007

Dear colleagues,

Today 25th September 2007, it is a great day for IFATSEA and all ATSEP worldwide.

At the third meeting of the ICAO Technical Commission, I introduced WP-210 (see www.icao.int) that was drafted jointly by IFATSEA and ITF.

I am very happy to report that this working paper was supported by the meeting thus tasking ICAO to put ATSEP Licensing into their work program.

I would like to thank the States and Organisations that supported our papers and spoke in favour: France, IFATCA, Japan, Colombia, India, Italy, Nigeria and partly USA.

Also, I would like to thank Affiliates who have lobbied their States Representatives for gaining their support. A first step has been taken but more work has to be done and I am looking forward to further support.

Many thanks and Congratulations to all!

Yvan Ouellette

President
