IFATSEA supports the European Research area in Aeronautics and Space.

The ATENAA project is a R&D project funded by the European Commission under the 6th framework program, priority 1.4 "Aeronautics and Space".

Project aimed at addressing various key issues in the area of Mobile Communication Networks and Optical Coms.

The ATENAA consortium comprises of several leading European companies:

- Selex - Italy (as Project leader).
- German Aerospace Centre - DLR
- EADS Deutschland GmbH
- IN.S.I.S S.R.L. - Italy
- Technological Institute of Piraeus - Greece
- THALES Avionics
- THALES Communications

The Project was presented at the last IFATSEA Conference in Miami USA in 2005. Director Europe Carlos Viegas , participated on behalf of IFATSEA in the annual in the Advisory Board.
